

Neural Progenitor Cell Markers

For the **Identification** and **Characterization** of neural progenitor cells

▲ **Detection of Neural Cell Progenitor Markers CXCR4 and SSEA-1 by Flow Cytometry**

◀ **Verification of Neural Progenitor Cell Multipotency**

▶ Neural Progenitor Cell Marker Kit

Product Information

Includes Eight markers
Compatible with detection of SSEA-1 and CXCR4 by flow cytometry
Compatible with detection of all markers by immunocytochemistry

Benefits

Eight markers increase the confidence in accurate cell identification
High quality antibodies provide consistent and reproducible results
Cost-effective use of resources

Order Information

SC025 Human / Mouse/ Rat Neural Progenitor Cell Marker Antibody Panel

▶ Antibodies for Neural Progenitor Cell Marker

Activin A	EAAT1 / GLAST-1	EOMES	FABP7 / B-FABP
GFAP	ID2	Musashi-1	NCAM-1 / CD56
Nestin	Pax6	ROR2	S100B
Sox1	Sox2	SSEA-1	Vimentin
