

Neural Progenitor Cell Markers

For the **Identification** and **Characterization** of neural progenitor cells

▲ Verification of Neural Progenitor Cell Multipotency

▲ Detection of Neural Cell Progenitor Markers CXCR4 and SSEA-1 by Flow Cytometry

01 Neural Progenitor Cell Marker Kit(#SC025)

Product Information Includes Eight markers
 Compatible with detection of SSEA-1 and CXCR4 by flow cytometry
 Compatible with detection of all markers by immunocytochemistry

Benefits Eight markers increase the confidence in accurate cell identification
 High quality antibodies provide consistent and reproducible results
 Cost-effective use of resources

Order Information # SC025 Human/ Mouse/ Rat Neural Progenitor Cell Marker Antibody Panel

02 Antibodies for Neural Progenitor Cell Marker

Activin A	EAAT1/GLAST-1	EOMES	FABP7 / B-FAMP
GFAP	ID2	Musashi-1	NCAM-1 / CD56
Nestin	Pax6	ROR2	S100B
Sox1	Sox2	SSEA-1	Vimentin
