

Tocriscreen FDA-Approved Compounds

A library of 160 biologically active compounds

Tocris® has over 10 years' experience of producing compound libraries. Drug-repurposing is a key strategy in the drug discovery process. Previously approved drugs have the advantage of being fully evaluated for efficacy and have known safety data, which can accelerate the drug discovery process.

Key Product Features

- 모두 FDA로 부터 승인된 화합물
- 160개의 compounds 구성
- 98% 이상의 고순도 compounds
- Ready to use 10mM DMSO
- 기존의 치료용 화합물 e.g. tamoxifen (#0999) 와 paclitaxel (#1097) 및 최근 많이 사용되는 e.g. gefitinib (#3000) 과 axitinib (#4350)을 모두 포함

* Data derived using the WHO Anatomical Therapeutic Chemical Classification System code (ATC code)

Product	Cat. no	No. Compounds	Vol.	Format
