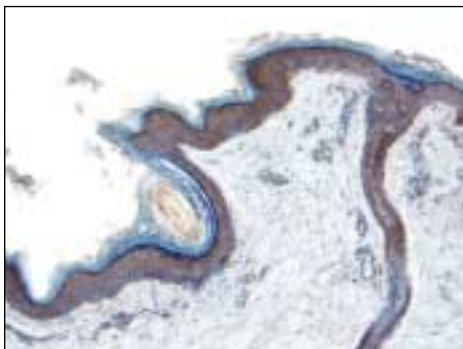

Figure 1. Detection of IGF-I R in paraffin-embedded sections of human skin using R&D Systems' mouse anti-human IGF-I R monoclonal antibody (Catalog # MAB391). Tissues were stained using R&D Systems' Mouse HRP-DAB Cell and Tissue Staining Kit (Catalog # CTS002; brown) and counterstained with hematoxylin (blue).

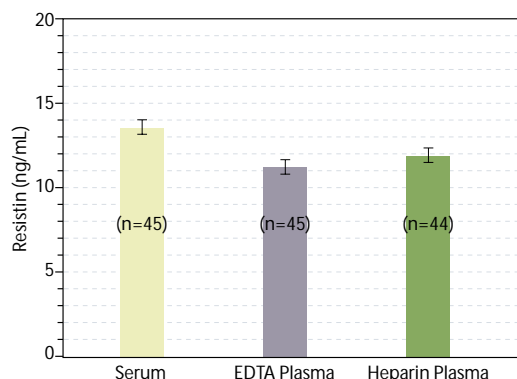

Figure 2. Resistin detected in normal human plasma and serum using R&D Systems' Human Resistin Quantikine® ELISA Kit (Catalog # DRSN00). Data shown is the mean \pm SE.
