

High Performance  
Life science reagents  
TOCRIS 제품들을  
웅비메디텍에서 만나십시오!

## Tocriscreen Compound Libraries

HTS와 HCS에 적합한 biologically active compound collections

1120개의 compounds 구성

98% 이상의 고순도 compounds

ready to use 10mM DMSO

Matrix tubes와 SepraSeal caps를 포함한 96well racks 형태

Custom Compound Library Service 가능

### Tocriscreen Total

#2884

1120 Biologically active compounds  
( 250ul 10mM solutions )

### Tocriscreen Mini

#2890

1120 Biologically active compounds  
( 50ul 10mM solutions )

## Tocriscreen Toolbox

80개의 compounds 구성

Tocris가 선택한 최상의 key protein targets 모음

모든 compounds에 대한 full biological and chemical data 제공

### Stem cell Toolbox

#5060

Contains small molecules for stem cell differentiation, reprogramming, signaling and self-renewal.  
( 250ul 10mM solutions )

### Epigenetics Toolbox

#5268

Induces chemical probes for epigenetic writer and eraser enzyme, and reader domains.  
( 250ul 10mM solutions )

### Kinase Inhibitor Toolbox

#3514

A broad range of kinase inhibitors covering the major protein and lipid kinases.  
( 250ul 10mM solutions )
