

Neural Stem Cell 연구자들을 위한 TOCRIS Reagents To Enhance NSC Differentiation

Products for Notch Signaling

Cat.#	Name	Description	Cat.#	Name	Description
1099	Forskolin	Adenylyl cyclase activator	3044	PD 173074	FGFR1 and-3 inhibitor
2634	DAPT	gamma-secretase inhibitor	4076	P7C3	NAMPT activator; also proneurogenic and neuroprotective
2864	Metformin hydrochloride	Activator of LKB1/AMPK; antidiabetic agent	4888	KHS 101 hydrochloride	Selective inducer of neuronal differentiation in hippocampal neural progenitors
2845	IBMX	PDE inhibitor(non-selective)	3835	TWS 119	GSK-3beta inhibitor, induces neuronal differentiation in ESCs
2815	Valproic acid, sodium salt	Histone deacetylase inhibitor	4011	EC 23	Synthetic retinoid; induces differentiation of stem cells
4126	DMH-1	Selective ALK2 inhibitor	5188	Neuropathiazol	Selective inducer of neuronal differentiation in hippocampal neural progenitors
0695	Retinoic acid	Endogenous retinoic acid receptor agonist	3115	WHIP 154	JAK3 kinase inhibitor. Also inhibits EGFR
3854	1-Oleoyl lysophosphatidic acid sodium salt	Endogenous agonist of LPA1 and LPA2	3656	Neurodazine	Induces neurogenesis in mature skeletal muscle cells
0927	Fluoxetine hydrochloride	5-HT re-uptake inhibitor	0238	O-Phospho-L-serine	Group III mGlu agonist
4366	SAG	Potent Smoothened receptor agonist; activates the Hedgehog signaling pathway	3877	TCS 2210	Inducer of neuronal differentiation in MSCs
4439	ISX 9	Neurogenic agent; induces neuronal differentiation of SVZ progenitors and also induces cardiomyogenic differentiation	5513	Isotretinoin	Endogenous agonist for retinoic acid receptors; inducer of neuronal differentiation

제품 상담 : 학술마케팅팀 안국희 (techserv@woongbee.com / 02-881-5432 내선 741)
